JISNOR4U

DELIVERY PARTNERSHIP PROPOSAL

Submitted to:

CEO, Skaitel

Online Marketplace Platform

1. Executive Summary

Jisnor4U is pleased to present this formal proposal for a delivery partnership with your online marketplace platform. As a tech-enabled, customer-focused delivery service operating across Freetown and its environs, Jisnor4U is uniquely positioned to serve as marketplace's trusted standard delivery partner.

This proposal outlines our delivery capabilities, service model, zonal pricing structure, and a proposed technology integration that will enable a seamless checkout and delivery experience for your customers — regardless of where their merchants are located across Freetown.

2. About Jisnor4U

Jisnor4U is a Freetown-based delivery and logistics platform built to make delivery simple, fast, and reliable for individuals and businesses across Sierra Leone. Through our mobile application and dispatch network, we connect customers with merchants and facilitate efficient last-mile delivery across all major zones in Freetown and surrounding areas.

What truly sets Jisnor4U apart is something no competitor can replicate overnight — our unwavering commitment to trust, reliability, and professionalism in everything we do. From the moment a package is picked up to the second it is delivered, every interaction with Jisnor4U reflects a standard of service that our customers and partners have come to depend on. We do not just deliver packages, we deliver confidence. Our riders are trained, our processes are structured, and our communication is consistent. In a market where delivery services can be unpredictable, Jisnor4U stands as a partner you can count on — every order, every time. This is not something you will easily find elsewhere in Sierra Leone.

3. Proposed Partnership Model

Jisnor4U proposes to serve as Marketplace official standard delivery partner, integrated directly into your marketplace checkout experience. The partnership is structured to benefit your merchants, customers, and operational efficiency simultaneously.

3.1 How It Works — Your Customer's Journey

Step	Action	Description
1	Customer Shops	Customer browses and adds products/services from any merchant on your marketplace platform.
2	Checkout	At checkout, customer selects their preferred delivery option. Jisnor4U appears as a delivery choice.
3	Redirect to Jisnor4U	Customer clicks on Jisnor4U — they are redirected seamlessly to the Jisnor4U delivery app.
4	Address Input	Customer inputs their delivery address. The Jisnor4U app automatically calculates the delivery fee based on distance and zone.
5	Confirmation & Dispatch	Customer confirms and pays. Jisnor4U dispatches a rider to collect from the merchant and deliver to the customer.
6	Delivery Complete	Customer receives their order. Delivery confirmation is shared with both customer and your platform.

4. Technology Integration — Jisnor4U App

A key value proposition of this partnership is the direct integration of the Jisnor4U delivery application into your marketplace platform. This removes the complexity of fixed zonal pricing from a single merchant location and instead delivers a dynamic, distance-based pricing model that works for every merchant on your platform across Freetown.

4.1 Why App Integration is the Right Approach

Challenge Without Integration	Solution With Jisnor4U Integration
Fixed zonal prices only work from one location	Dynamic pricing calculated from any merchant location across Freetown
Multi-merchant platforms cannot apply a single price point fairly	Each delivery is priced individually based on pickup and drop-off distance
Manual price calculation creates delays and errors	Prices are automatically calculated in real time — zero manual effort
Poor customer experience at checkout	Seamless one-click redirect from your marketplace checkout to Jisnor4U app
No visibility of delivery cost until after ordering	Customer sees exact delivery price before confirming — full transparency

Address: 5 Sanders Street, Freetown | **Email:** info@jisnor4u.com

4.2 Integration Features

- One-click redirect from your marketplace checkout to Jisnor4U delivery app
- Automatic distance-based delivery fee calculation upon address entry
- Real-time price display before customer confirms order
- Order tracking visible to both customer and your platform
- Delivery confirmation notification sent upon successful delivery
- API-ready integration compatible with standard marketplace platforms

4.3 Benefits to Your Marketplace

- No need to manage delivery logistics — fully handled by Jisnor4U
- Works for merchants based anywhere across Freetown — not limited to one zone
- Increases checkout conversion — customers know exact delivery cost upfront
- Enhances platform credibility with a professional, tech-enabled delivery partner
- Zero operational burden — Jisnor4U manages all rider dispatch and delivery

5. Delivery Pricing Structure

Jisnor4U operates a dual pricing model designed to work effectively for Marketplace's multi-merchant, multi-location marketplace:

5.1 Dynamic Pricing (Recommended — via App Integration)

When customers select Jisnor4U at checkout and are redirected to the app, delivery fees are automatically calculated based on the distance between the shop's location and the customer's delivery address. This is the recommended model for your marketplace given the diversity of shop's locations across Freetown.

Feature	Details
Pricing Basis	Distance-based — calculated automatically in real time
Shop Location	Works from any shop location across Freetown
Customer Experience	Customer inputs delivery address — price is instantly shown before payment
Transparency	Full price visibility at checkout — no hidden fees
Best For	Multi-merchant, multi-location platforms like yours

5.2 Zonal Pricing (Fixed Reference — Charlotte Street, CBD)

For merchants operating from or near the Central Business District (Charlotte Street, Freetown), Jisnor4U's standard zonal pricing applies. The table below provides a reference pricing guide from this fixed location across all 10 delivery zones:

A Communication	Dedicated app and assigned support line for your queries and escalations
------------------------	--

8. Why Choose Jisnor4U as Your Delivery Partner

What We Offer	What It Means for Online Marketplace
Tech-enabled app with dynamic pricing	Fair, transparent pricing for every customer regardless of merchant location
10-zone coverage across Freetown	Marketplace can onboard merchants from any part of Freetown with confidence
Seamless app-to-app checkout integration	Frictionless customer experience — one click from checkout to delivery confirmation
95% customer satisfaction rate	Marketplace customers receive reliable, quality delivery service
Experienced team with 2+ years of operations	Battle-tested logistics experience in Freetown's unique environment
Dedicated merchant & partner support	Any issues resolved quickly via dedicated Marketplace partner channel

9. Proposed Next Steps

We are excited about the opportunity to partner with your Marketplace and are ready to move quickly. We propose the following next steps:

Step	Action	Details
1	Proposal Review	Marketplace reviews this proposal and shares any questions or amendments
2	Partnership Meeting	Joint meeting to finalize terms, integration requirements, and timelines
3	MOU / Agreement	Sign a Memorandum of Understanding or formal partnership agreement
4	Technical Integration	Jisnor4U and Marketplace tech teams collaborate on app integration and testing
5	Pilot Launch	Launch with a select group of merchants for a 30-day pilot period
6	Full Rollout	Scale partnership to your merchants following successful pilot

10. Closing Statement

At Jisnor4U, we believe that reliable, tech-enabled delivery is the backbone of any successful online marketplace. We are committed to providing your customers with the best possible delivery experience — transparent pricing, timely dispatch, and professional service every single time.

We see this partnership as a long-term relationship built on trust, technology, and a shared commitment to making commerce easier for everyone in Sierra Leone.

We look forward to your response and to building something great together.
